

## **Financing the transition: alternative and inclusive business models for energy citizenship and community energy actions.**

Live session for the FINANCE module

8th November 2023, 10-12 CET

Register here: <https://bit.ly/EC2-Academy-5>

### **What to expect from the live training session?**

Which are possible and different business models financing energy transition? Which is the role that individuals can play in them? How can different financing models foster inclusion and participation in energy transition?

One of the major barriers to energy transition is the availability of financial capital. The achievement of climate neutrality and energy transition goals requires the reconfiguration of current markets in favor of more flexible, sustainable and accessible financial models that can better adapt and support different economies, whilst giving space to individuals and communities to actively participate and finance energy transition.

The goals of this session are i) to provide an understanding of the different financial models in the energy system ii) explore how different economic models support or hinder the emergence and mainstreaming of energy citizenship and community energy initiatives and iii) explore innovative, fair and inclusive opportunities to finance the energy transition.

The session is part of the Community Energy Academy training programme ([communityenergyacademy.eu](http://communityenergyacademy.eu)). The session will be facilitated by ICLEI Europe and Wrocław University of Economics and Business as part of the EC<sup>2</sup>-project.

## Agenda
